Color Selection for InduraFloor

Depending on the IKG solution, we have different colors for the base or topcoat to produce the desired finish for your project, based upon our expertise in industry trends and knowledge of tile finishes.

Custom colors are available but are subject to minimum order requirements, surcharge and lead time. Colors show approximate tone without texture. The color of the actual product may vary slightly. Final approval should be made with a test patch of the actual material over the actual substrate.

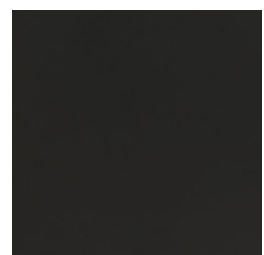

Please contact us for available colors, lead time, and availability for the solution you are interested in.
